

# Artificial Intelligence and Machine Learning

Businesses adopting artificial intelligence and machine learning technologies and the companies developing them turn to us to navigate regulatory complexities, potential liabilities, and transactional considerations they face on the path to realizing AI's tremendous potential.

We bring together our extensive technical backgrounds and broad range of subject matter experience to help them:

- identify potential risks through data protection impact assessments;
- navigate whether AI's role is categorized as a medical device by the FDA;
- maneuver through ambiguous FDA guidelines related to AI in drug development;
- counsel on the murky landscape of copyright law in connection with generative AI;
- comply with digital communication laws regarding the use of AI systems in content moderation and advertising;
- ensure the use of AI systems is done in an ethical and responsible fashion;
- mitigate risks from contractual, e-discovery, product liability, regulatory, and tort-based claims; and
- complement their businesses and expand into new markets through investments in and acquisitions of sophisticated AI platforms.

From major corporations to emerging growth companies and their investors, we provide this guidance across the full range of AI/ML technologies including:

- fraud detection and digital identity;
